

The Russian and International unions of scientific and engineering public associations with the participation of the A.M. Prokhorov Academy of Engineering Sciences have summed up the results of the XX All-Russian contest “Engineer of the Year-2019”.

Traditionally, the results of the All-Russian competitions “Engineer of the Year” and “Hope of Russia” have been summarized on the Day of Russian Science. This year, the ceremonial summing up of the 20th All-Russian contest “Engineer of the Year” is also dedicated to World Engineering Day, which, starting from this year, by decision of UNESCO will be celebrated annually on March 4. The World Federation of Engineering Organizations (WFEO), and the Russian Union of Scientific and Engineering Public Associations as a member of the WFEO, were the initiators of the establishment of this holiday.

The competition is the largest social project implemented in Russia with the goal of identifying and disseminating best practices and achievements of engineering personnel who are the best in their field of activity.

The competition is supported by the Ministry of Labor and Social Protection of the Russian Federation, the Russian Academy of Sciences, the Federal Agency for Youth Affairs, the Scientific and Technical Council of the Military-Industrial Commission of the Russian Federation and other federal executive bodies, as well as authorities in most regions of the country.

The All-Russian contest “Engineer of the Year” is held annually in 45 nominations in two versions: “Professional Engineers” - for participants in the competition who have at least 5 years of engineering experience and “Engineering of the Young” - for young professionals under the age of up to 30 years inclusive. The competition takes place in 2 rounds.

The winners of the competition are awarded with a diploma of the jury of the competition, a commemorative medal “Laureate of the competition” and are entered in the Register of Professional Engineers of Russia.

According to the results of 2019, 244 participants of the competition according to the version of Professional Engineers and 162 to the version of Engineering Young Art are awarded with diplomas and commemorative medals “Laureate of the Competition”.
