

WORLD ENGINEERING DAY 4.3.2021

Engineers as Builders of a Sustainable Society

Webinar Thursday 4.3.2021 at 8.30–10.00

We welcome you to celebrate the first official day for Engineers in Finland!

On World Engineers Day we highlight the role of engineers in solving major sustainability problems, such as developing climate technologies. In the webinar we discuss what kind of changes are required in the Finnish innovation system to unlock the whole potential of engineers in promoting sustainable development.
