

We Collaborate **Actively** and **Resiliently** on **Earth**

Young people play an important role in sustainable development. Therefore, education issues must go beyond tests and examinations outcomes. In this project, students will be encouraged to participate in collaborative activities to discuss the importance of the following commemorations:

Safer Internet Day (9th February)

International Mother Language Day (21st February)

World Engineering Day for Sustainable Development (4th March)

World Poetry Day (21st March)

Earth Day (22nd April)

World Book and Copyright Day (23rd April)

World Day for Cultural Diversity for Dialogue and Development (21st May)

European Neighbours' Day (29th May)

The students will work collaboratively to address issues such as the use and spread of information, our digital and carbon footprint, the importance of learning languages, cultural diversity and sustainable communities.

**WORLD
ENGINEERING
DAY** FOR SUSTAINABLE
DEVELOPMENT

Aims

- To engage in online-based projects
- To promote collaborative work
- To promote creativity
- To promote curiosity
- To develop reading and writing skills
- To develop listening and speaking skills
- To develop critical thinking skills
- To develop digital literacy skills
- To promote the use of digital tools
- To raise awareness about the need for online safety
- To raise awareness about the importance of copyright
- To foster relationships between schools
- To develop the use of the English language
- To promote new and meaningful learning experiences

Activities:

- Word cloud with words about engineering and technology
- Celebration cards
